M. Sc. BIOTECHNOLOGY (Part-II)**

**As per National Education Policy 2020, To be implemented  
from Academic Year 2024-2025**

## Structure and Credit Distribution of the PG Biotechnology Degree Program

Vide G.R. No. NEP-2022 /CR No. 09/VISHI-3 / शिकाना dated April 20, 2023, the Directive, covering the Credit distribution structure for Four Year UG Honours/ Honours with Research Degree Programme with Multiple Entry and Exit options, was issued. In Continuation of Section 8 of this GR- 'Design of PG Master's Programmes', the Illustrative Table depicting the Credit Distribution for Two Year PG Programme with one Exit Option/ One Year PG Programme is as given below:

### Illustrative Credit distribution structure for Two Years/ One Year PG (M.A./M.Sc./M.Com.) and Ph. D. Programme

Year (2 Yr PG)	Level	Sem. (2 Yr)	Major		RM	OJT / FP	RP	Cum. Cr.	Degree
			Mandatory	Electives					
I	6.0	Sem I	12-14 (2*4 +2*2 or 3*4+2)	4	4			20-22	PG Diploma (after 3 Yr Degree)
		Sem II	12-14 (2*4 +2*2 or 3*4+2)	4		4		20-22	
<b>Cum. Cr. For PG Diploma</b>			<b>24-28</b>	<b>8</b>	<b>4</b>	<b>4</b>	<b>-</b>	<b>40-44</b>	
<b>Exit option: PG Diploma (40-44 Credits) after Three Year UG Degree</b>									
II	6.5	Sem III	12-14 (2*4 +2*2 or 3*4+2)	4			4	20-22	PG Degree After 3- Yr UG Or PG Degree after 4- Yr UG
		Sem IV	10-12 (2*4 +2 or 3*4)	4			6	20-22	
<b>Cum. Cr. for 1 Yr PG Degree</b>			<b>22-26</b>	<b>8</b>			<b>10</b>	<b>40-44</b>	
<b>Cum. Cr. for 2 Yr PG Degree</b>			<b>46-54</b>	<b>16</b>	<b>4</b>	<b>4</b>	<b>10</b>	<b>80-88</b>	
<b>2 Years-4 Sem. PG Degree (80-88 credits) after Three Year UG Degree or 1 Year-2 Sem PG Degree (40-44 credits) after Four Year UG Degree</b>									
	8.0		Course Work Min. 12 (3*4)			Training in Teaching / Education/ Pedagogy: 4	<b>16 + Ph. D. Work</b>		<b>Ph.D. in Subject</b>

**Abbreviations:** Yr.: Year; Sem.: Semester; OJT: On Job Training; Internship/ Apprenticeship; FP: Field projects; RM: Research Methodology; Research Project: RP; Cumulative Credits: Cum. Cr.

(a) With effect from Academic Year 2023-24, Two years Master's Degree Program was be revamped as per the Illustrative Credit Distribution given in the above table.

(b) Credits offered per Semester will be a Minimum of 20 and a Maximum of 22. While minimum credits are mandatory as per National Credit Framework, the Universities can evolve the mechanism for providing Semester/ Level wise credit attainment flexibility within the broad framework.

(c) Under the One-year PG Diploma program, and two-year master's Degree program, the students must complete on-the-job training/internship of 04 credits during summer break, after completion of the second semester of the first year in the respective Major Subject.

(d) The 4 Credits Research Methodology Component is mandatory in the First Year.

(e) Since the Master's Programme is based on DSC Specialisation, the PG curricular framework will not include Minor Subject. Electives selected in the PG program may be **Relevant to OR Supportive of the Major Subject** chosen. The Statutory authorities of the University or Autonomous College can take a decision in this regard.

(f) The students will have to undertake a research project of 4 credits in Semester III and a research project of 6 credits in Semester IV in the second year of the two-year master's degree program. This is also applicable to the students admitted to one year PG program after completion of four year UG Program.

(g) Colleges already having permission and recognition for the PG degree programme along with UG degree programme in the same Major shall be automatically allowed to continue PG degree programme in the same Major without undergoing any additional procedures. Similarly, the colleges with approved PG programme and Ph.D. Research Centre in the same Major shall be automatically allowed to continue PG and Ph. D. Degree programme without undergoing any additional procedures.

(h) The exit option at the end of one year of the Master's degree program will commence from AY 2024-25. Students who have joined a two-year Master's degree program may opt for exit at the end of the first year and earn a PG Diploma.

(i) The PG Diploma may be awarded to a student provided they have earned the requisite credits in one year including on-the-job training of 04 credits during summer break, after completion of the second semester of the first year in the respective Major Subject.

(j) The one-year Master's Degree Program will begin with effect from Academic Year 2027-28.

(k) Re-entry to complete the PG degree, after taking the exit option, will be permissible up to 05 years from the date of admission to the PG program.

(l) With regards to the Eligibility criteria and Procedure for admission to the Ph.D. Programme, Duration of the Ph.D. Programme, Eligibility and Allocation of Research Supervisor, Course Work (Credit requirements, number, duration, syllabus, minimum standards for completion), Research Advisory Committee and its Functions, Academic, research, administrative, and infrastructure requirements to be fulfilled by Colleges for getting recognition for offering Ph.D. Programme, Award of Ph. D. Degree etc, the Universities and Autonomous Colleges must comply UGC (Minimum Standards and Procedure for Award of Ph.D. Degree) Regulations, 2022, dated Nov. 7, 2022.

(m) The University and Autonomous College must adopt this GR within 10 days after its issue

### **Preamble of the course:**

Biotechnology has grown, extensively in last two of decades. This advanced ‘interdisciplinary’ life science branch encompasses areas viz. molecular biology, genetics, biochemistry, microbiology, immunology, virology, plant and animal tissue culture, chemistry, and engineering. It is a fast emerging “cutting edge” science with distinctive advantages as it finds applications in practically all aspects of life. The subject offers exciting opportunities in various fields from basic research to industry-oriented career. Global and local focus has slowly shifted to using knowledge of life Science for innovative technology development that is being used for betterment of human life. Many fundamental research fields from cell biology to molecular biology, from genetic engineering to stem cell research, from bioinformatics to genomics-proteomics, from environmental biology and to biodiversity, from microbiology to bioprocess engineering, from bioremediation to drug discovery etc. comes under the umbrella of Biotechnology.

The proposed choice-based credit curriculum and grading system will cater to the existing interdisciplinary nature of biotechnology can also offer many courses to the other branches of life science. The generative power of biological data is effectively harnessed by biotechnology like no other field. Economic and social renaissance is staged on biotechnology especially, since it’s biomedical and cutting-edge technological applications are tremendously powerful in shaping this century and exciting bio future. Keeping in view the expanse and applications of Biotechnology in every field, there is going to be a perpetual demand for resource personnel with Biotechnology specialization. The post graduate program is aimed to cater to this ever-increasing demand and to groom the students to excel in their future career. Education and research sectors require such interdisciplinary trained workforce to develop future generations of science leaders.

### **Introduction:**

Masters in Biotechnology course syllabus is revised as per NEP guidelines 2020 to offer the needs of changing scenario in biological science. The changing scenario of higher education in India and abroad is taken into consideration while formulation this syllabus and more oriented towards current need of modern research and industrial sectors. The present syllabus is as per National Education Policy 2020, which encompasses the fundamental academics at one end and latest technologies in life science at the other. Theory courses will help students develop their knowledge sets on various topics of biotechnology, to which, they are introduced at the undergraduate level. Extensive practical courses are designed to supplement the theory courses with hands on experimentation in wet-lab and on fields. Empowerment of students to face research and industrial outlets is at the center of this syllabus. Students having to select their own courses will develop the depth in specialization and make them ready to face the upcoming scientific advances in the world without any further training. M.Sc. syllabus has been prepared keeping in vision the undergraduate curriculum. At the undergraduate level, students were introduced to many fundamental topics in life sciences such as molecular biology, developmental biology, fermentation technology, biodiversity, bioinformatics, and tissue culture etc. At the post graduate level, they will be also be acquainted with

the thrust/new areas of biotechnology like bioinformatics, clinical research, data base management, IPR, Food Technology etc. to give the students the advantage of not only learning these subjects but also give them the edge over others in their employability. A research project/ industrial training Modules are incorporated to provide a buffer zone for budding biotechnologists eager to enter the life science sector.

Objectives:

- To help the students to build interdisciplinary approach
- To empower students to excel in various research fields of Life Sciences
- To inculcate sense of scientific responsibilities for social and environment awareness.
- To acquaint the students with thrust areas of biotechnology
- To adapt the internationally acknowledged Choice Based Credit System (CBCS) that offers opportunities to learn core subjects and to explore additional avenues of learning beyond the core subjects for complete development of an individual.

**Eligibility for the course M.Sc. Biotechnology.**

Any candidate completed B.Sc. in Biotechnology from any recognized university.

**Examination pattern**

70 Marks for end semester examination and 30 marks for continuous evaluation pattern

35 Marks for External Practical examination and 15 Marks for Internal practical examination

**Passing marks**

Passing marks will be 40 % in each paper of continuous evaluation and end semester exam separately.

**Procedure for continuous evaluation**

Written test	20 marks
Assignment	5 Marks
Seminar/ attendance	5 Marks
	30 Marks

**Nature of question paper for End semester examination**

Que. No.	Type	Max marks
1	2 marks x 7 questions (Any 6)	12
2	4 marks x 4 questions (Any 3)	12
3	5 marks x 4 questions (Any 3)	15
4	5 marks x 4 questions (Any 3) Short notes type	15
5	8 marks x 3 questions (Any 2)	16
	Total	70 marks

## Revaluation

There shall be a revaluation of answer scripts of end semester examination (out of 70 marks) of theory papers only, but not of internal or continuous evaluation papers as per Ordinance no. 134 A and B

## Grading system

Percentage	Grade	Grade Point
80-100	O: Outstanding	10
70-79	A+: Excellent	9
60-69	A: Very Good	8
55-59	B+: Good	7
50-54	B: Above Average	6
45-49	C: Average	5
40-44	P: Pass	4
0-39	F: Fail	0
-	Ab: Absent	0

<b>Course Outcomes (COs)</b> <b>On completion of the course, the students will be able to:</b> <ul style="list-style-type: none"> <li>• Analyze antigen antibody interactions.</li> <li>• Acknowledge quantitative and qualitative techniques</li> </ul>		
<b>Sr. No.</b>	<b>COURSE CONTENT / SYLLABUS</b>	<b>No of practical</b>
1	Determination of blood groups and Rh factor.	1
2	Determination of agglutination reaction with reference to the Widal test	1
3	Determination of precipitation with reference to VDRL.	1
4	Determination of haemagglutination <i>Treponema pallidum</i> Haemagglutination test.	1
5	Detection, Identification, and Quantification of antibodies by ODD (Ouchterlony Double Diffusion).	1
6	Separation and characterization of serum-by-serum electrophoresis method.	1
7	Demonstration of Antigen-Antibody reaction by counter-current Immunoelectrophoresis and Rocket Electrophoresis.	2
8	Separation and characterization of lymphocytes from blood.	1
9	Determination of Antigen-Antibody reaction by ELISA- DOT and PLATE	2
10	Immunoprecipitation	
11	Determination of Rapid Plasma Reagin (RPR)	1
12	Purification of IgG from Bovine Serum Albumin	1
	Differential count of WBC	1
	Detection, Identification, and Quantification of Antibodies Single Radial Immunodiffusion	1

	<b>MODERN EDUCATION SOCIETY'S</b> <b>Nowrosjee Wadia College, Pune (Autonomous) NEP</b>	
<b>Master of Science in Biotechnology</b>		
<b>SEMESTER –IV Major Paper 19(B)(Theory)</b>		
<b>Year – II</b>	<b>Paper No- PBTMJ244(B)</b>	<b>Credits 4</b>
<b>Semester - IV</b>	<b>Name of Paper- Virology and Toxicology</b>	<b>Hours 60</b>
<b>Course Outcomes (COs)</b> <b>On completion of the course, the students will be able to:</b> <ul style="list-style-type: none"> <li>● Study the scope of Toxicology</li> <li>● Acquire knowledge on the types of Toxicology</li> <li>● Know Metabolism and testing of Toxicology</li> <li>● Learn the basic concepts of plant animals, Viruses, and bacteriophages along with their multiplication in host cells</li> </ul>		
<b>Sr. No.</b>	<b>COURSE CONTENT / SYLLABUS</b>	<b>Lectures</b>
<b>Unit -I</b>	<b>History:</b> History, origin, and evolution of viruses, pioneers of Virology. <b>Nomenclature and classification of viruses:</b> <ul style="list-style-type: none"> <li>● Criteria used for naming and classification,</li> <li>● Current ICTV classification of viruses of bacteria, plants and animals, and humans.</li> </ul> <b>Morphology and properties of viruses:</b> <ul style="list-style-type: none"> <li>● Physical- morphology and structure,</li> <li>● sedimentation, electrophoretic mobility, buoyant density; Biochemical-chemical</li> <li>● composition, nucleic acids, proteins, enzymes, lipids, carbohydrates, polyamines, cations,</li> <li>● virus stability; Biological- Host range, inclusion bodies, transmission.</li> </ul> <b>Transmission of viruses:</b> Non-vector and vector mode of transmission of viruses	8
<b>Unit -II</b>	<b>Isolation, cultivation, and maintenance of viruses:</b> <ul style="list-style-type: none"> <li>● Isolation and cultivation of plant and animal viruses (experimental plants and tissue culture, experimental animals, embryonated eggs, organ cultures, primary and secondary cell cultures, suspension and monolayer cell cultures, cell strains, cell lines).</li> </ul> <b>Purification of viruses:</b> <ul style="list-style-type: none"> <li>● Extraction of viruses from tissues, clarification, and concentration of viruses in clarified extracts by physical and chemical methods, further purification of viruses by rate zonal / equilibrium density gradient centrifugation, Criteria of virus purity, Quantitation, and Preservation of purified virus preparations.</li> </ul>	7

<p><b>Unit -III</b></p>	<p><b>Major characteristics of Virus families:</b></p> <ul style="list-style-type: none"> <li>● Adenoviridae, Bromoviridae, Bunyaviridae, Caulimoviridae, Flaviviridae, Geminiviridae, Hepadnaviridae, Herpesviridae, Orthomyxoviridae,</li> <li>● Biology of sub-viral agents: Satellite viruses, sat-RNAs, DI particles, viroids, virusoids, and prions.</li> </ul>	<p>7</p>
<p><b>Unit -IV</b></p>	<p><b>Bacteriophages:</b></p> <ul style="list-style-type: none"> <li>● Biology of major RNA (MS2, Q<math>\beta</math>) and DNA (T4, lambda, <math>\Phi</math>x174, M13) Bacteriophages,</li> <li>● Replication of M13, T4 and lambda phages; biology of cyanophages.</li> </ul> <p><b>Plant Viruses:</b></p> <ul style="list-style-type: none"> <li>● TMV- general characters- morphology-replication-RNA as its initiator of infection. Cauliflower mosaic virus; Transmission of plant viruses;</li> <li>● Common viral diseases of crop plants- paddy, cotton, tomato, and sugarcane. Viruses of cyanobacteria, algae, fungi, and insects.</li> <li>● Epidemiology, Diagnosis, and Treatment of Viral Diseases; Viral Vaccines and Antiviral agents</li> </ul> <p><b>Animal Viruses:</b></p> <ul style="list-style-type: none"> <li>● Biology and pathogenesis of SARS, Hepatitis A and B Viral Infections.</li> <li>● Comet assay</li> </ul>	<p>8</p>
<p><b>Unit -V</b></p>	<p><b>Introduction to toxicology:</b></p> <ul style="list-style-type: none"> <li>● History and scope of toxicology</li> <li>● Source of toxicants</li> <li>● Classification of toxic agents</li> </ul> <p><b>Mechanism of toxicity:</b></p> <ul style="list-style-type: none"> <li>● Toxicant delivery, reaction with the target molecule, cellular dysfunction, inappropriate repair, and adaptation.</li> <li>● Cytotoxicity mechanisms of cell death mitochondrial dysfunction.</li> <li>● various branches of toxicology</li> <li>● Different types of toxicities (acute, sub-acute, chronic, sub-chronic toxicity)</li> </ul> <p><b>Types of Toxicology:</b> General Toxicology, Generic Toxicology, Organ Toxicity</p>	<p>7</p>
<p><b>Unit -VI</b></p>	<p><b>Metabolism of toxicants:</b></p> <ul style="list-style-type: none"> <li>● Phase I Reactions: Microsomal oxidation Nonmicrosomal oxidations Reduction Reactions, Hydrolysis, Epoxide Hydration. cooxidation.</li> <li>● Phase II Reactions: Conjugation reactions, Methyl transferases and Acylation.</li> <li>● Reactive Metabolites: nature, stability, and fate of reactive metabolites,</li> <li>● Elimination of Toxicants: renal, hepatic, and respiratory elimination.</li> <li>● Non target organ toxicity: Chemical carcinogenesis mechanisms Of carcinogens.</li> </ul>	<p>8</p>

<p><b>Unit -VII</b></p>	<p><b>Toxicology Testing:</b></p> <ul style="list-style-type: none"> <li>● Food toxicology: introduction, safety standards for foods and food ingredients and contaminants.</li> </ul> <p><b>In Vivo Toxicology:</b></p> <ul style="list-style-type: none"> <li>● Testing of acute, sub chronic and chronic toxicity.</li> </ul> <p><b>In Vitro testing:</b></p> <ul style="list-style-type: none"> <li>● Cell Culture Methods, Ames forward mutation assay, Assessing genotoxicity: mitotic index, chromosomal aberrations, micronucleus assay, cytotoxicity, and apoptosis assay. Neurotoxicity testing.</li> <li>● A brief outline of methods of toxicity assessment. Animal use in toxicology and animal welfare.</li> </ul>	<p>7</p>
<p><b>Unit -VIII</b></p>	<p><b>Carcinogenicity and Genotoxicity</b></p> <ul style="list-style-type: none"> <li>● Causes of cancers</li> <li>● History</li> <li>● What is a Carcinogen?</li> <li>● Tumor types</li> <li>● Classical Mechanism of Tumor Formation</li> <li>● Testing for Cancer</li> <li>● Toxicity of Cancer Treatments</li> <li>● Overview of genotoxicity</li> </ul>	<p>8</p>
